

## Technology, Expertise & Care, We Provide the Best Comprehensive Breast Care for YOU...

As an established leader in the screening and detection of breast cancer, Adventist Midwest Breast Care Center is committed to the early and accurate diagnosis of breast cancer and dedicated to providing a comprehensive network of services for your complete breast health. With our quality healthcare services, genuine support and state-of-the-art facilities, we aim to provide the best comprehensive breast care and to address the needs of each patient as a whole.

### Complete Care and Support

The Breast Care Center is designed to make your breast care experience easier and more pleasant. We offer a one-stop approach to services, eliminating the frustration and anxiety of waiting for a diagnosis, as well as having to wait to see a surgeon if a concern is revealed. Our team includes radiologists, surgeons, pathologists, radiation oncologists, medical oncologists, reconstructive surgeons, genetic counselors and rehabilitation experts.

Our multi-disciplinary approach allows for more specialized care and constant communication among physicians. Not only do clinicians meet each patient, but the doctors then work together to formulate a plan of action based on the patient's individual case. Once the patient starts her treatment plan, the doctors meet routinely to discuss the patient's progress and to decide if any changes need to be made to the treatment plan.

### Patient Navigation Team

When you start at the Breast Care Center, you will be paired with a "navigator" who will guide you every step of the way from your first appointment to any necessary treatments or surgeries. Their job is to make the process as painless as possible, both physically and emotionally. They are there to answer any questions, make appointments, help you communicate with healthcare providers or just to give you a shoulder to lean on. Before they were "navigators", they were patients, and are now survivors...they understand.

Janet, Linda & Rexine

### Other Breast Care Center Benefits

- Personalized assistance in managing a speedy diagnosis
- Development of an individualized treatment plan
- One fee for the initial consultation with the multidisciplinary physician team
- Advanced radiography and diagnostic capabilities
- Second opinion and breast consultation services
- Access to National Cancer Institute clinical trials
- On-site information from the Adventist Cancer Network's Retting Library

### Breast Care Center Medical Director

Dr. Patricia Madej is currently the Medical Director of the Breast Care Center and one of the medical oncologists at Hinsdale Hematology Oncology Associates. She received her Medical Degree from the University of Illinois in Chicago and went on to complete her internship and residency at the University of Illinois and her Hematology-Oncology Fellowship at the Michael Reese Hospital. She has been a member of the medical staff at Adventist Hinsdale Hospital since 1983 and presently also on staff at Adventist Bolingbrook Hospital. She has served on the medical board of St. Thomas Hospice, Y-Me (now the Breast Cancer Network of Strength) and as Chairman of the Department of Medicine at Hinsdale Hospital.
